Introduction

Welcome

This application provides three different application examples to demonstrate assessment criteria for C# Assessment 2.

The main menu screen is where you can open, and then use any of the three options provided. This help document will provide information on how to use each application and give you an overview of what they are doing.

Getting Started

System requirements

This application will run on all Microsoft Windows machines from Windows 7 to the most recent version of Microsoft Windows 10.

You should have at least 2GB of Memory and a minimum of 500mb's of Hard Drive space.

This Application requires that users have the most recent installation of Microsoft's .NET framework installed on their system.

Getting help

If further help with this application is required, or you are having persistent problems you can directly send a report to the application developer at the following address:

via Email: contact@lachlanashton.dev

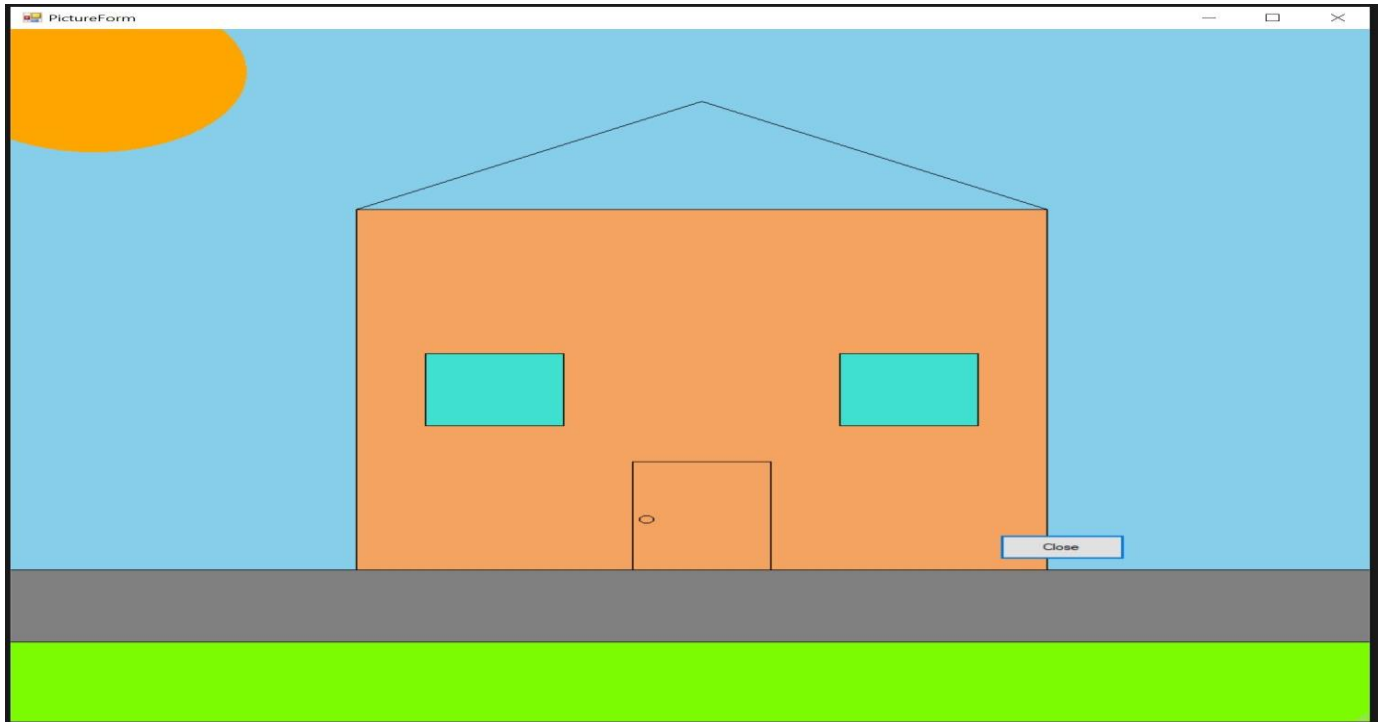

via Phone: +61499965444

You should receive a response within three business days.

Image Application

Information

The Image Application required no input from the user. This application will simply draw a simple 2d image and display it using the paint method provided within the C# applications namespace.

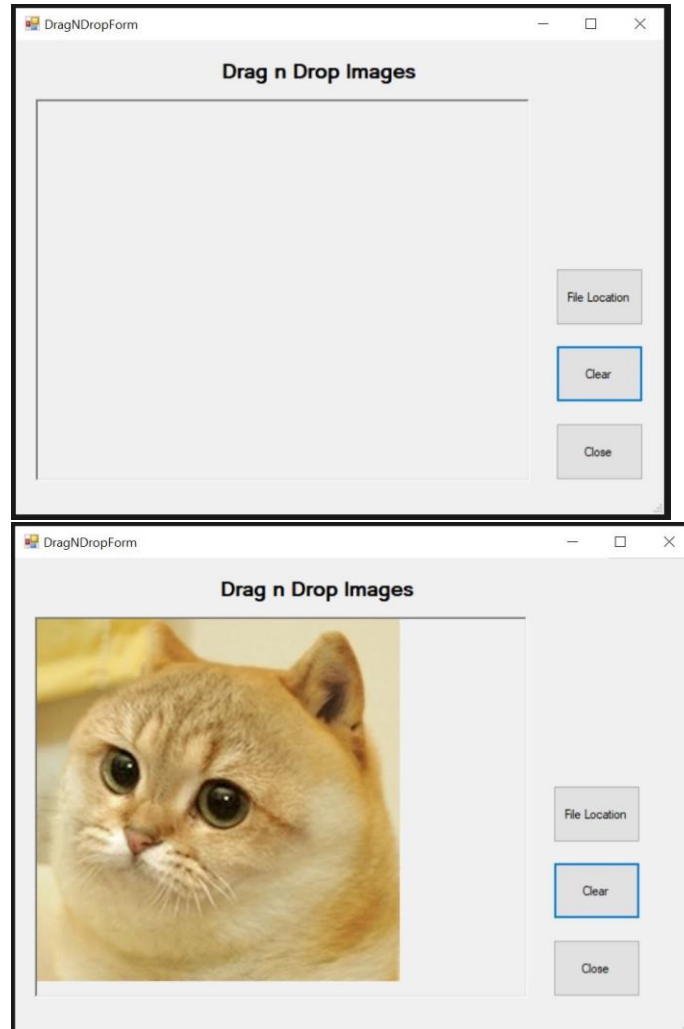

Help

To close this application the user should simply hover over the 'Close' button provided on the screen with their cursor and then press their left mouse button, this will shut down this window of the application and return the user to the home screen.

Drag n Drop Application

Information

The Drag n Drop Application allows for a user to drop an image into the frame of the application. The user then has three options, 'View File Location', 'Clear', and 'Close'.

Help

The View File Location Button:

When this button is clicked will open a dialog box displaying the users dropped file location. If no image has been dropped and the user presses this button it will display a dialog box with a message indicating that they are required to first drop an image into the application.

The Clear Button:

When this button is clicked it will clear the image that the user has dropped from the application.

The Close Button:

This button when pressed will shut down the Drag n Drop Application and return the user to the App Selection Menu.

Add User Application

Information

The Add User Application allows a user to enter up to five user objects into a list. The user will then be presented with the current selected users' information in a text box below.

Help

To use the Add User Application a user must enter a first name, last name and age into the text boxes provided. Once they click the 'Add to List' button, they will then see the users First Name and Last Name presented in the list. When they select one of the indexes presented in the list it will show all the users information combined into one line of text.

To close the Add user application the user must move their cursor over the 'Close' button and press their left mouse button.

First Name Requirements:

This text is of a string variable type and can hold numbers, symbols and letters.
The user should only enter letters to maintain naming standards of the list.

Last Name Requirements:

This text is of a string variable type and can hold numbers, symbols and letters.
The user should only enter letters to maintain naming standards of the list.

Age Requirements:

This can be any number as long as it is a whole number.
This must not contain any letters, or symbols.
If letters, or symbols are entered it will result in an error and user will not be entered into the list.

List Requirements:

Only a maximum of 5 users can be added to the list at any one time.
To change the list in the current version the user must close the current instance of the Add User Application and then open a new instance in the App Selection Menu.
